

Week 1 Submission

Repo & Git Workflow Setup

Project: MATCH.AI - AI Resume Screener & Feedback System

Student: Majid Ali (@majidali1256)

Program: AI & Generative AI Fellowship @ Zeppelin Lab

Date: July 14, 2026

1. GitHub Repository Link

GitHub Repo: <https://github.com/majidali1256/ai-resume-screener>

The repository is public and contains the complete AI Resume Screener project.

2. Branch List (main, dev, feature/*)

Branches Page: <https://github.com/majidali1256/ai-resume-screener/branches>

Screenshot of branches showing main, dev, and multiple feature/* branches:

The screenshot displays the GitHub interface for the repository `majidali1256/ai-resume-screener`. The 'Branches' tab is selected, showing a list of active branches. The branches are organized into two sections: 'Default' and 'Active branches'. The 'Active branches' section contains a table with the following data:

Branch	Updated	Check status	Behind	Ahead	Pull request
<code>main</code>	2 hours ago				
<code>feature/week1-submission</code>	2 hours ago				
<code>dev</code>	2 hours ago				
<code>feature/stitch-mcp-design</code>	yesterday				
<code>feature/3d-modern-frontend</code>	yesterday				
<code>feature/web-ui-dashboard</code>	yesterday				

A link 'View more branches >' is located at the bottom of the 'Active branches' section.

GitHub Branches Page - showing main, dev, and feature/* branches

3. README.md Link

README.md: <https://github.com/majidali1256/ai-resume-screener/blob/main/README.md>

The README.md includes all required sections:

- Project Overview & description
- Tech Stack (complete table)
- Features & Architecture (with Mermaid diagram)
- Setup Steps (prerequisites, clone, install, configure, run)
- API Reference (endpoints, request/response schemas)
- Project Structure (full directory tree)
- Team & Roles
- Live Deployment Links

4. GitHub Issues (Tasks Created & Assigned)

Issues Page: <https://github.com/majidali1256/ai-resume-screener/issues?q=is:issue>

Screenshot of 7 issues created, assigned to @majidali1256, and closed:

The screenshot displays the GitHub Issues page for the repository `majidali1256/ai-resume-screener`. The page is filtered to show issues with the query `is:issue is:closed`. There are 7 closed issues listed, all assigned to @majidali1256. The issues are:

- Deploy to Hugging Face Spaces (#13)
- Setup pytest test suite and GitHub Actions CI/CD (#12)
- Implement Evidence Grounding Verifier (#11)
- Add PDF/DOCX/TXT document extraction support (#10)
- Build 3D Glassmorphism Executive Dashboard (#9)
- Implement Gemini Flash AI assessment engine (#8)
- Setup FastAPI backend with /api/scan endpoint (#7)

The left sidebar shows the repository navigation menu with options like Code, Issues, Pull requests, Actions, Projects, Security and quality, and Insights. The right sidebar shows the repository's statistics: 0 forks and 0 stars.

GitHub Issues - 7 tasks created, assigned, and completed

5. Commit History

Commits Page:

<https://github.com/majidali1256/ai-resume-screener/commits/dev>

Screenshot of commit history showing 30+ commits:

GitHub Commit History - dev branch

6. Merged Pull Request

Merged PR #14: <https://github.com/majidali1256/ai-resume-screener/pull/14>

Screenshot of merged PR #14 closing all 7 issues:

The screenshot displays a GitHub Pull Request (PR) #14 titled "feat: Complete Week 1 AI Resume Screener — Final Submission #14". The PR is marked as "Merged" and was merged 2 hours ago. The repository is "majidali1256 / ai-resume-screener".

The PR description includes a section titled "Week 1 Final Submission" and a list of "Features Completed":

- ✓ FastAPI backend with /api/scan endpoint
- ✓ Google Gemini Flash AI assessment engine
- ✓ Pydantic structured output validation
- ✓ Evidence Grounding Verifier
- ✓ 3D Glassmorphism Executive Dashboard
- ✓ Multi-format support (PDF, DOCX, TXT)
- ✓ Pytest test suite (5/5 pass)
- ✓ GitHub Actions CI/CD pipeline
- ✓ Hugging Face Spaces deployment

The PR also mentions "Closes #7, #8, #9, #10, #11, #12, #13".

Below the description, a commit is shown: "chore: finalize Week 1 submission documentation" with a green checkmark and the commit hash "4e53545".

At the bottom, a Copilot AI review comment is visible: "AI review requested due to automatic review settings 2 hours ago".

On the right side, the "Reviewers" section lists "sourcery-ai[bot]" and "Copilot". The "Assignees" section shows "No one assigned". The "Labels" section shows "None yet". The "Projects" section shows "None yet". The "Milestone" section shows "No milestone". The "Development" section shows "Successfully merging this pull request may close these issues." and a link to "Setup FastAPI backend with /api/scan endpoint".

GitHub PR #14 - Merged into main

7. Confirmation: .env is NOT in the Repository

The .gitignore file explicitly excludes all environment files:

```
# Environment & Secrets (NEVER COMMIT API KEYS)
.env
.env.local
*.env
```

Screenshot of .gitignore file on GitHub:

GitHub .gitignore - confirms .env files are excluded

8. Blockers from This Week (Optional)

No major blockers. Successfully deployed the AI Resume Screener with live Gemini Flash integration on Hugging Face Spaces. Minor challenge was Gemini API free-tier rate limiting which was resolved by switching to the gemini-flash-lite-latest model.

9. Live Deployment Links

Live Demo:	https://huggingface.co/spaces/majidali1256/AI-Resume-Screener-Studio
GitHub Repository:	https://github.com/majidali1256/ai-resume-screener
Hugging Face Model:	https://huggingface.co/majidali1256/AI_Resume_Scanner
README.md:	https://github.com/majidali1256/ai-resume-screener/blob/main/README.md
Merged PR #14:	https://github.com/majidali1256/ai-resume-screener/pull/14
Issues (Closed):	https://github.com/majidali1256/ai-resume-screener/issues?q=is:issue+is:closed
Branches:	https://github.com/majidali1256/ai-resume-screener/branches

10. Tech Stack Summary

Language:	Python 3.10+
Backend:	FastAPI + Uvicorn
AI/LLM:	Google Gemini Flash (REST API)
Validation:	Pydantic AI (Structured JSON)
Frontend:	HTML5, CSS3, JS (3D Glassmorphism)
Gradio:	Gradio 5.12.0 (HF Spaces)
Testing:	Pytest (5/5 automated tests)
CI/CD:	GitHub Actions
Deployment:	Hugging Face Spaces, Docker
Version Control:	Git + GitHub (main, dev, feature/*)
