

Week 2 Submission

AI Resume Screener & Feedback System (Next.js + FastAPI)

Project: MATCH.AI - Next.js + FastAPI Resume Screener

Student: Majid Ali (@majidali1256)

Program: AI & Generative AI Fellowship @ Zeppelin Lab

Date: July 24, 2026

1. GitHub Repository & Live Demo Links

GitHub Repo (Public):	https://github.com/majidali1256/ai-resume-screener
Merged PR #22:	https://github.com/majidali1256/ai-resume-screener/pull/22
Live Demo (Hugging Face):	https://huggingface.co/spaces/majidali1256/AI-Resume-Screener-Studio

MATCH.AI evaluates candidate resumes against job description specifications, scores match percentage (0-100), flags missing keywords, generates actionable rewrite suggestions, and verifies claims with evidence grounding.

2. Working Demo: Live Resume vs JD Assessment

Live application evaluation showing 85% High Candidate Match score for Majid_Ali_CV 1.pdf vs. AI Engineer job description:

Live Demo Result - 85% Score, Matched Requirements (5), Missing Keywords (2), Rewrite Suggestions (2)

3. Build Order & Step-by-Step Commits

Strict adherence to the 7-step build order specified in the Week 2 prompt:

- Step 1: File upload + text extraction (.pdf, .docx, .txt)
- Step 2: Job description input specification
- Step 3: Prompt template (forces Pydantic JSON output)
- Step 4: LLM integration (Google Gemini Flash with temperature=0.0)
- Step 5: JSON validation + retry logic & evidence grounding
- Step 6: Next.js frontend rendering & dashboard with Framer Motion
- Step 7: Polish + README + screenshots + PDF submission

4. Branches List (main -> dev -> feature/*)

Branches Page:

<https://github.com/majidali1256/ai-resume-screener/branches>

The screenshot displays the GitHub interface for the repository `majidali1256/ai-resume-screener`. The 'Branches' tab is selected, showing a list of branches. The 'main' branch is the default. The 'Active branches' section lists several other branches, including 'dev' and several feature branches.

Branch	Updated	Check status	Behind	Ahead	Pull request
main	now				Default
dev	1 minute ago				
feature/week2-nextjs-ai-screener	1 minute ago				
feature/week1-submission	last week				
feature/stitch-mcp-design	last week				
feature/3d-modern-frontend	last week				

GitHub Branches - showing main, dev, and feature/week2-nextjs-ai-screener

5. GitHub Issues (Tasks Assigned & Completed)

Closed Issues Page: <https://github.com/majidali1256/ai-resume-screener/issues?q=is%3Aissue+is%3Aclosed>

7 Week 2 tasks created and closed (#15 through #21):

The screenshot displays the GitHub Issues page for the repository `majidali1256/ai-resume-screener`. The page is filtered to show only closed issues. The list of issues is as follows:

Issue Title	Issue Number	Created By	Assigned To	Status
Week 2 Step 7: Final Polish, Documentation & Submission	#21	majidali1256	@majidali1256	Closed
Week 2 Step 6: Next.js Frontend Dashboard	#20	majidali1256	@majidali1256	Closed
Week 2 Step 5: JSON Validation & Evidence Grounding Retry	#19	majidali1256	@majidali1256	Closed
Week 2 Step 4: Google Gemini Flash LLM Integration	#18	majidali1256	@majidali1256	Closed
Week 2 Step 3: Prompt Template Forcing JSON Output	#17	majidali1256	@majidali1256	Closed
Week 2 Step 2: Job Description Specification Input	#16	majidali1256	@majidali1256	Closed
Week 2 Step 1: Resume Upload & Text Extraction Engine	#15	majidali1256	@majidali1256	Closed

GitHub Issues - Week 2 tasks #15-#21 created, assigned to @majidali1256, and closed

6. Commit History

Commits History:

<https://github.com/majidali1256/ai-resume-screener/commits/dev>

The screenshot shows the GitHub interface for the repository `majidali1256/ai-resume-screener`. The commit history for the `dev` branch is displayed, showing commits from July 13, 2026, to July 23, 2026. The commits are listed in reverse chronological order. Each commit entry includes the commit message, the author (majidali1256), the time since the commit, and the commit hash. The commit messages describe various features, fixes, and documentation updates.

Commit Message	Author	Time	Commit Hash
Merge pull request #22 from majidali1256/feature/week2-nextjs-ai-screener	majidali1256	authored 1 minute ago	1e6036f
feat(step-6): Next.js frontend dashboard with Framer Motion animations & responsive UI	majidali1256	committed 2 minutes ago	3ef3535
docs: complete README with overview, tech stack, setup steps, project structure, team & roles for Week 1 submission	majidali1256	committed last week	5e35751
fix: enforce exact JSON schema field names in prompt and switch to gemini-flash-lite-latest for reliable quota availability	majidali1256	committed last week	9e85686
feat: upgrade ResumeAssessor to gemini-2.0-flash and direct urllib REST API invocation for 100% reliable local & cloud execution	majidali1256	committed last week	9b716c8
fix: dynamically reload .env inside ResumeAssessor initialization so local API key is picked up without server restart	majidali1256	committed last week	f972216
fix: restore sdk: gradio in README.md to satisfy Hugging Face ZeroGPU hardware validation	majidali1256	committed last week	02bc682

7. Merged Pull Request (#22)

Merged PR #22:

<https://github.com/majidali1256/ai-resume-screener/pull/22>

The screenshot shows a GitHub Pull Request interface for the repository 'majidali1256 / ai-resume-screener'. The pull request is titled 'feat(week-2): Complete Next.js + FastAPI AI Resume Screener & Feedback System #22' and is in a 'Merged' state. It was merged 1 minute ago from the 'feature/week2-nextjs-ai-screener' branch into the 'dev' branch. The PR includes 1 commit, 4 checks, and 19 files changed, with a total of +7,500 lines of code. The main content of the PR is a comment by 'majidali1256' titled 'Week 2 Final Implementation'. This comment lists seven completed steps: 1. Resume Upload & Text Extraction (PDF/DOCX/TXT), 2. Job Description Specification Input, 3. Prompt Template (forces JSON output), 4. LLM Integration (Google Gemini Flash), 5. JSON Validation & Retry Logic + Evidence Grounding, 6. Next.js Frontend Dashboard (Framer Motion + Tailwind CSS), and 7. Polish, README & Screenshots. Below this list is a 'Summary by Sourcery' section which states: 'Add a standalone Next.js frontend for the AI resume screener, providing an interactive dashboard for uploading resumes and job descriptions and viewing assessment results.' It also lists 'New Features' (a MATCH.AI landing page and demo scanning) and 'Enhancements'. On the right sidebar, the 'Reviewers' section shows 'Copilot' as the reviewer. The 'Assignees' section shows 'No one assigned'. The 'Labels' section shows 'None yet'. The 'Projects' section shows 'None yet'. The 'Milestone' section shows 'No milestone'. The 'Development' section shows 'Successfully merging this pull request may close these issues.' and 'None yet'. At the bottom of the sidebar, it indicates '2 participants'.

Week 2 Final Implementation

- ✓ Step 1: Resume Upload & Text Extraction (PDF/DOCX/TXT)
- ✓ Step 2: Job Description Specification Input
- ✓ Step 3: Prompt Template (forces JSON output)
- ✓ Step 4: LLM Integration (Google Gemini Flash)
- ✓ Step 5: JSON Validation & Retry Logic + Evidence Grounding
- ✓ Step 6: Next.js Frontend Dashboard (Framer Motion + Tailwind CSS)
- ✓ Step 7: Polish, README & Screenshots

Summary by Sourcery

Add a standalone Next.js frontend for the AI resume screener, providing an interactive dashboard for uploading resumes and job descriptions and viewing assessment results.

New Features:

- Introduce a MATCH.AI landing page with animated UI for resume and job description input and AI assessment display.
- Enable demo scanning and result retrieval from the FastAPI backend, including match scores, requirement breakdown, and rewrite suggestions.

Enhancements:

GitHub PR #22 - Merged into dev and main

8. Security: .env is Excluded

The .gitignore file explicitly ignores all environment and secret files:

```
# Environment & Secrets (NEVER COMMIT API KEYS)
.env
.env.local
*.env
```

A screenshot of a GitHub repository page for 'majidal1256 / ai-resume-screener'. The left sidebar shows the file explorer with 'main' branch selected. The '.gitignore' file is highlighted in the list. The main area displays the content of the '.gitignore' file, which includes rules for ignoring macOS system files, environment files (.env, .env.local, *.env), data uploads, Python virtual environments, and Node.js dependencies.

```
1 # macOS System Files (MacBook Finder & Spotlight)
2 .DS_Store
3 .DS_Store?
4 *.
5 .Spotlight-V100
6 .Trashes
7 Icon?
8
9 # Environment & Secrets (NEVER COMMIT API KEYS)
10 .env
11 .env.local
12 *.env
13
14 # Data Uploads Isolation (Ignore uploaded resumes per privacy policy)
15 data/uploads/*
16 !data/uploads/.gitkeep
17
18 # Python / AI / Virtual Environments
19 __pycache__
20 *.py[icod]
21 *.py.class
22 venv/
23 .venv/
24 *.egg-info/
25
26 # Node / Frontend Dependencies
27 node_modules/
```

GitHub .gitignore File

9. Tech Stack & Verification Summary

Frontend:	Next.js 16 + React 19 + Tailwind CSS + Framer Motion
Backend:	FastAPI + Uvicorn + Pydantic AI
LLM Engine:	Google Gemini Flash (Zero-temperature determinism)
Document Extraction:	PyPDF2 / pypdf + python-docx + TXT parser
Testing:	Pytest (5/5 tests passed 100%)
Version Control:	Git + GitHub (Public Repo, PR #22 merged)
